

What is claimed is:

1. An assembly having edible components associated therewith, comprising:
 - a) a garment to be worn by a user, such garment having at least one structural supporting element that is at least partially detachably interconnectable with another garment component;
 - 5 b) a plurality of apertured candies having an aperture sized so as to be threadable on said at least one structural supporting element.
2. The assembly as set forth in Claim 1, wherein said garment further comprises at least one pocket able to accommodate consumable candy items.
3. The assembly as set forth in Claim 1, wherein said candy components have a shape selected from the group consisting of hearts, diamonds, shamrocks, candy canes, pumpkins, ghosts, butterflies and cherries.
4. The assembly as set forth in claim 1, wherein the garment is selected from the group of panties, underwear, and swim wear.

5. A garment for a person comprising:
at least one non-edible strap;
at least one edible item interconnected to said strap; and
wherein said garment can be worn by the person.
6. The garment as claimed in claim 5, wherein said at least one edible item comprises an aperture, wherein said strap passes through said aperture.
7. The garment as claimed in claim 6, wherein said at least one non-edible strap has a width, and wherein said width is greater than or equal a diameter of said aperture.
8. The garment as claimed in claim 7, wherein a friction force between an outside surface of said strap and an inside surface of said aperture is equal to or greater than a force generated by the weight of said edible item.
9. The garment as claimed in claim 8, wherein said strap comprises a material selected from the group consisting of velvet, silk and satin.
10. The garment as claimed in claim 6, wherein said edible item comprises a candy.

11. The garment as claimed in claim 10, wherein said candy includes a wrapper having a wrapper aperture that is axially aligned with the aperture in said candy, said wrapper lining an outside surface of said candy and an inside surface of said aperture.

12. The garment as claimed in claim 5, wherein said at least one non-edible strap includes a free end adapted for receiving at least a second edible item.

13. The garment as claimed in claim 5, wherein said strap is washable or dry-cleanable and reusable.

14. A garment for covering a portion of a person's body, the garment comprising:

a front panel;

a rear panel interconnected to said front panel by a crotch portion;

at least one strap interconnectable to said front panel and said rear panel, said strap

5 adapted for passing through an aperture of a candy, said strap consisting essentially of:

a material having a length greater than or equal to a width of the candy, said

material having a width that is greater than or equal to a diameter of said

aperture of said candy, said material having an outside surface that contacts

an inside surface of said aperture, said outside surface of said material

10 developing a frictional force with said inside surface of said candy that is

equal to or greater than a weight of said candy, said strap having a loop at an

end portion, said loop wrapping around at least a portion of said candy;

and wherein upon removing said candy from said strap, said front panel, said rear
panel, said crotch portion, and said strap are non-edible and washable.

15. A garment for covering a portion of a person's body, the garment comprising:
a front panel including a right front strap and a left front strap;
a rear panel interconnected to said front panel by a crotch portion, said rear panel
including a right rear strap interconnectable to said right front strap, and a left rear strap
interconnectable to said left front strap;
5 and at least one edible item having an aperture sized to slidably receive one of said
right front strap, said left front strap, said right rear strap and said left rear strap, and wherein
said at least one edible item is located on one of said right front strap, said left front strap,
said right rear strap and said left rear strap.

16. The garment as claimed in claim 15, wherein an end portion of at least one
of said right front strap, said left front strap, said right rear strap and said left rear strap
includes a first retention fitting.

17. The garment as claimed in Claim 16, wherein said first retention fitting
comprises a substantially conical tip portion and a flared portion made of a resilient material,
and wherein said flared portion has an undeformed width that is greater than a diameter of
said aperture, wherein the flared portion is deformable to receive the edible item when the
5 edible item is pushed over the flared portion of the retention fitting.

18. The garment as claimed in claim 17, wherein an end portion of another of said right front strap, said left front strap, said right rear strap and said left rear strap includes a second retention fitting, said second retention fitting including means for detachably attaching to said first retention fitting.

19. The garment as claimed in claim 18, wherein said means for detachably attaching includes a connector.

20. A bra comprising:

a first cup;

a second cup interconnected to said first cup by a strap; and

a edible item threaded onto said strap.

21. The bra as claimed in claim 20, wherein said strap includes at least a first end that is selectively detachable from one of said first or second cups.

22. The bra as claimed in claim 21, wherein said first end is sized to pass through an aperture in said edible item.

23. A fob comprising:

at least one non-edible strap;

at least one edible item interconnected to said strap by passing said strap through an aperture in said at least one edible item;

5 wherein said strap further comprises a material having a width that is greater than or equal to a diameter of said aperture of said edible item, said material having an outside surface that at least partially contacts an inside surface of said aperture, said outside surface of said material developing a frictional force with said inside surface of said edible item that is equal to or greater than a weight of said edible item.

24. The fob as claimed in claim 23, wherein said strap further comprises a loop at an end portion of said strap, said loop wrapping around at least a portion of said edible item.

25. The fob as claimed in claim 23, further comprising means for attaching said strap to an article.

26. The fob as claimed in claim 25, wherein said means for attaching comprises a hook and loop connector.
